Special issue
Abstracts of the Xth International Symposium on Atherosclerosis, Montréal, 9–14 October 1994

★ after an abstract number indicates a Young Investigator Award finalist, separately displayed

Sunday 9 October 1994

State-of-the-Art Symposia abstracts
Treatment of atherosclerosis: new considerations 1
Targeted prevention for the higher-risk patients 2

Monday 10 October 1994

Poster abstracts
Animal models 4
Epidemiology 11
Risk factors 23
Modified lipoproteins 37
Lipid peroxidation 49
Lipases 59
Nutrition and diet 70

Monday 10 October 1994

Workshop abstracts
W1 Animal models of atherosclerosis 78
W2 Risk factors, prevention programs and strategies to improve compliance 80
W3 Remnant metabolism 81
W4 Modified lipoproteins and atherosclerosis 83
W5 Regulatory role of LPL in lipoprotein metabolism 85
W6 Nutrition, lipoproteins and atherosclerosis 87
W7 Treatment advances: I – Dyslipoproteinemias 88

State-of-the-Art Symposia abstracts
Global risk assessment for coronary heart disease 91

Tuesday 11 October 1994

Poster abstracts
Arterial wall matrix 93
Proteoglycans 97
Pathobiology 98
Gene expression and targeting 103
Receptors 109
Metabolism 117
Triglycerides 126
Dyslipoproteinemias 129
Apolipoproteins A and B 136
Nutrition and diet 142
Clinical trials 149
Treatment I 161

Workshop abstracts
W8 Vessel wall matrix in atherogenesis 169
W9 Molecular genetics and gene expression 171

W10 Intracellular cholesterol transport 173
W11 Lipoprotein receptors and related diseases 175
W12 HDL-cell interaction 176
W13 The plurimetabolic syndrome 178
W14 Treatment advances: atherosclerosis 180

Wednesday 12 October 1994

Poster abstracts
Cytokines/growth factors 183
Cell biology 185
Genetics 199
Lipoproteins 211
HDL and reverse cholesterol transport 223
Diabetes 238
Treatment II 249

State-of-the-Art Symposia abstracts
Clinical intervention in atherosclerosis: 258
Defining the benefit, refining the therapy 258
The interplay of triglyceride-rich lipoproteins in atherosclerotic disease 259

Thursday 13 October 1994

Poster abstracts
Apolipoprotein E 261
Rheology and hemodynamics 264
Hemostasis 266
Hypertension 270
Lipoprotein(a) 276
Imaging 293
Cardiology 299
Methods 306
Treatment III 309
Various 326

Workshop abstracts
W15 The monocyte-macrophage in atherogenesis 330
W16 Genetics in the prediction of atherosclerosis 331
W17 Apolipoprotein E: new insights and future directions 334
W18 Coronary atherosclerosis: focus on restenosis 335
W19 Reverse cholesterol transport, HDL and risk of CVD 337
W20 Diabetes and atherosclerosis 339
W21 Thrombosis, fibrinolysis and atherosclerosis 341

Friday 14 October 1994

Workshop abstracts
W22 Hemodynamics, the arterial wall and atherosclerosis 343
W23 Genetic variation, hypertension and atherosclerosis 344
W24 Lp(a), thrombogenesis and atherosclerosis 346
W25 Promising advances and untraditional views in atherothrombosis research 348
W26 Apo B, LDL metabolism and related diseases 349
W27 Vascular imaging and non-invasive techniques for assessment of atherosclerosis 351
W28 Treatment advances: atherothrombosis and vasomotor dysfunction 353

Author index 355
